**Subject:** key deliverable in 6.4 that I mentioned before  
**Attachments:** Reyes\_EHP\_Phthalates\_STICs\_version.docx

Hey Jason:

Would you have 30 minutes or so to do a quick review of this short paper that's a key deliverable in HHRA's 6.4. This was the effort by Paul Price of NERL (and the post-doc that NCEA paid for) that I noted before with that abstract you saw? I don't feel technically qualified to weigh in on the merits beyond maybe policy and how they integrated Epid data, but I think someone who is in NCEA should more readily review for the Mixtures/RA elements...

It's in STICS right now, so I'd imagine we have a couple of weeks to raise any concerns. And, it goes w/o saying, this is a close-hold (no dissemination), since it's a pre-journal submission. Let me know what you think, as I know you are busy.

Thanks,

Mike
